## **Arvinode Exhaust System**

The past comes alive with this new reproduction of the Arvinode exhaust system originally found on 65 289 Hipo cars built around October 1964 to March 1965. This system was duplicated using original blueprints with details provided by the family of the Arvinode designer and Arvin employees who worked on the system. This system is not just cosmetic, the internal design of the forward chambers and resonators has been duplicated as well to provide an accurate sound. The system comes in pieces ready to be welded as original or clamped for ease of installation. Bolts up to a correct H-pipe (not included). Systems come two ways: as original with the external damping bar or without the bar to save on costs. Correct hangers will be available soon.

5210-16A    Original style        \$499.95

5210-16B    Economy style        \$379.95

Available from your closest National Parts Depot warehouse.
